

YES SOS

YesSOS Personal Emergency GPS/Mobile locator.

YesSOS Personal Emergency GPS/Mobile locator.

- Sends an SOS alert to an unlimited number of mobile numbers and email addresses when activated.
- Sends street address of location.
- Holder can send non-SOS location to unlimited number of mobiles and email addresses.
- Track it over the Internet anytime on a PC or mobile.
- Use it as a mobile phone with 3 speed dial numbers.
- Phone the person carrying it.
- Optional carry-case, car charger and carry straps.

Who can benefit?

- Fleet operators
- Lone workers
- Children
- Elderly or physically challenged
- Anyone concerned about personal safety for themselves or others

How it Works

GPS and mobile device inside Yes SOS unit sends latitude and longitude to our service centre via SMS.

Position is instantly converted to a street address and is sent to you as an SMS and also an email.

If you prefer you can then log into the service centre website, www.phantomeye.com on a PC or mobile and view street maps showing the holder's position.

Supply the Yes SOS locator to anyone and avoid large mobile phone bills

Only 3 preset numbers can be called from it.

Anyone can phone it just like a normal mobile phone

*SIMcard not supplied; a prepaid simcard is OK

Small tracking and alert charges apply.
